

Fashion Design

Associate in Applied Science Degree

This program provides the skills and knowledge required for fashion designers to communicate effectively in visual and verbal formats; to prepare students to use creative methodology to solve visual problems; to provide advanced knowledge of arts through diverse global, cultural, and historical perspectives; to utilize industry software and technologies to create fashion design; and to prepare students for a career as a freelance fashion designer. Graduates are prepared to enter the fields of fashion design, apparel, pattern making, and fashion illustration.
