

Video Production

Associate in Science Degree

The program provides students with a fundamental educational experience in shooting, editing, and producing digital video. It is designed for students who want to enter the film industry or produce their own narrative works. The Video Production program is also a transfer program that meets the requirements of the SUNY Communication: Media Transfer Pathway. Students interested in careers in video production, camera operation, cinematography, videography, visual effects, or video editing can utilize this pathway as a foundation for transfer to programs leading to these video production related careers.
